

My Portfolio

A Summery of my architecture work

About Me

I'm Seyed Majid (Ramtin) Mehravar and 38 years old ,I'm iranian and lives in tehran ,After finish my academic university course always i try to keep up to date knowledge in the field of architecture in all section as well as gaining experience in the design of residential, office, villa and the like has provided the opportunity for my clients to meet the different tastes of their design needs for the interior and exterior of their projects.

I do my job freelancelly for 2 years with my brand which is **R Design Studio**.In this regard, by accurate information and demands, provided by the client, as well as considering the principles and rules of architecture and considering the conditions and requirements of the project, i act in the most optimal way to design.

Education

Description about my job

1. Get all information and requirement and interest of my customer , analysis it (for Facade design or etc) and just for interior design
In case if nessesary i made mood board (Photoshop or Powerpoint)
2. Initial Site Plan of project based on site measurement (Autocad)
3. Design concept of each zone in projcet considering the element and principle of architecture
4. 3D modeling and get test render for each zone (3ds Max – Vray)
5. Choose material and linghting and put them in renders (or made material board)
6. In rendering normally used compatibale funrtiure with design except customer emphasis on special model
7. In this stage prepeard presentaion file include : site plan , renders , alternatives , RCP plan or anything need to show customer acording to them request (powerpoint & PDF)
8. Also for presentaion if for customer possible for meeting i used Real Time show the space and moving in all space (Vantage or Lumion)
9. After a time i get comment of my customer if they need some change s in desgin and agian sent them final version
10. At the end i get written approval for final design version and sent all data to head of contractor who supposed to do construction.
11. It depens on form of contract i did supervision on my design during the construction process till end and if nessesary to change my design in some space beacuse of executive problem after interact between contactor and client the changes are done.

- **I did some activity separate of above for example i did just 3d modeling and rendering or Real Time for the other construction group or Architects company or in some project i did just choosing material**

Facade Design

Location: Tehran, Iran
Type: Official Buildings
Status: Facade
