Iman Kashanifard

Architect | CG Artist

based in Tehran | born in 2000/feb/3

In the realm of architecture and design, I have engaged in a journey spanning over three years, refining my skills in architectural design and visualization. More recently, I have embarked upon a new venture within the sphere of construction and execution. Armed with a degree in architecture, I simultaneously assume roles as a photographer, musician, programmer, and website designer.

My interests are diverse yet interconnected. In addition to my creative pursuits, I am committed to disseminating my expertise.

-Concept artist and CG artist

Parsis Zarmehr Kish | Aug 2023 - present

-Project control expert

Bame poonak project | May 2023 - Aug 2023

-Architectural associate and CG artist

Paadarchitects | Feb 2022 - present

-Freelancer | Feb 2020 - present

-Tutor (3ds Max, corona and vray) | April 2023 - present

Maryam Alavimoghadam

Architect | CG Artist

based in Tehran | born in 2000/May/10

I have been working in feild of graphic and architectural design for few years and recently entered into construction and visualization.

-Consept artsit and CG artist

Parsis Zarmehr Kish | Sep 2023 -present

-Project control expert

Bame poonak project | May 2023 - Sep 2023

-Architectural design Intern

Polrood | Oct 2022 - Jan 2023

-Architectural softwares Intern

Emkan | Sep 2021 - Jul 2022

-Freelancer | Feb 2020 - present

Mega Window

The spatial quality of the work space usually depends on your distance from the window. But what if the window comes and pulls the green view and the outside air inside? What if the window is some kind of spatial object instead of a surface?

Mega-Window, which is considered a renovation project, tries to invent a window that moves the boundary between inside and outside air. In this way, inside and outside does not follow the pre-given diagram of infill buildings. Mega-Window is an experiment for grafting the window and reproduces several new ones from each window so that everyone has access to a dedicated window next to their desk.

Ramsar promenade-huts

The Ramsar promenade-huts is the result of superimposing the diagram of a bridge and a hut, reminiscent of a historical desire to reside above the forest trees. This aspiration needs to be reconsidered today under different circumstances. How could we suspend seven huts above the forest in a way that they have no contact with the ground? How could we ensure public access to the forest for individuals who do not rent the cabins?

The solution to these challenges lies within the distinctive attributes of the forest itself: its narrowness and being surrounded by two asphalt levels. Consequently, we have devised a bridge that traverses the forest space, like a promenade, creating a secondary ground for the landing of the huts during their circular movement.

Architect: Yaser Mousapour, Paad architects

Design team: Iman Kashanifard, Kimia Sari,
Ghazal Mousavi, Zahra Hatami

Visualization: Iman Kashanifard

Softwares: 3dsmax, Vray, Chaos Phoenix

Cubic villa
Softwares: Revit, 3dsmax, Chaos Corona

House in the room
Softwares: 3dsmax, Chaos Corona

Other art works

Softwares: 3dsmax, Chaos Corona, Vray, Vantage, Unreal engine, Chaos phoenix
