# ABOUT US

## INTRODUCTION

ARMINARMAN Studio was established by Armin Rahimi and Arman Rahimi in 2019 and provides complete architectural services for both public and private sectors. They have completed numerous projects and have been honored in national competitions. Eco-friendly design and research of architectural ideas are key features of this collection, which can be seen in the spaces designed in various projects.

## OUR TEAM

Arman Rahimi, born in 1996, has a master's degree in architecture from Shahid Beheshti University. He has been a partner and founder of ARMINARMAN Studio Design Group for eight years now. He also has a history of working with Navaran-Design and Contracting Company, Taha Consulting Engineers, and Arash-4D Design Group (Fourth Dimension of Space). During his professional career, he has won national titles and deserved recognition for designing projects ranging from residential apartments to educational and multi-functional complexes.

Armin Rahimi, born in 1996, has a master's degree in landscape architecture from Azad University, Tehran South branch. He has been a partner and founder of ARMINARMAN Studio Design Group for eight years now. He also has a history of working with Navaran Design and Contracting Company, Taha Consulting Engineers, and Banyan Construction Group. During his professional career, he has won national titles and deserved recognition for designing projects ranging from residential apartments to educational and multi-functional complexes.

CLIENT | SCHOOL RENOVATION ORGANIZATION - NOSAZIMADARES  
ARMINARMANSTUDIO

CONCEPT DESIGN

Adhering to geographical conditions, paying attention to the climate, nature and the surrounding environment and integrating the building with the earth, water, wind, rain and sun, properly exploiting the design and environment. The walls of the schools are considered as the body and facade of the city, therefore, in this design, by combining full and empty walls, while maintaining the privacy of the school space,

we tried to create a diverse wall by predicting green spaces around the wall in a modular way for the environment. provide a city The urban wall of the school with a small backyard for each class creates an indirect relationship for the students with the urban space.

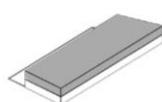

The retreat of the urban wall of the school at the entrance is planned to create a distance between urban traffic nodes and the entry and exit of students from the school. Volume design based on separation of function and use of space.

Examining the adjacencies and zoning of spaces, taking into account the values of Iranian architecture (with the influence of time and modern technology), Iranian culture and identity. Single layer and the possibility of two-way ventilation for spaces, especially classes

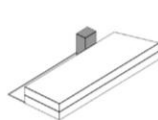

KONG SCHOOL LACATED IN BANDAR-E KONG 2021 COMPETITION OF SCHOOL RENOVATION ORGANIZATION 2rd place

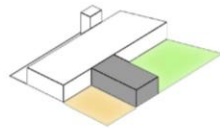

The setback of the building - definition of the entrance

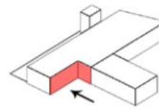

East-west extension

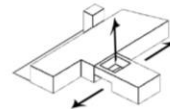

Using traditional element- respecting the texture of Bandar Kong

Splitting the school into two courtyards in order to separate the play area for big and small children

make the yard bigger for children

Creating an interaction space between two courtyards for visual communication
