NARENJ VILLA

DESIGN JUSTIFICATION

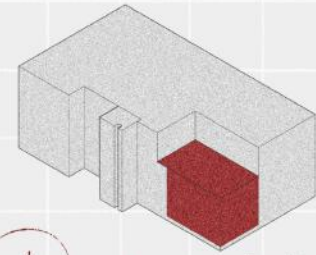

① construction site
as a volume

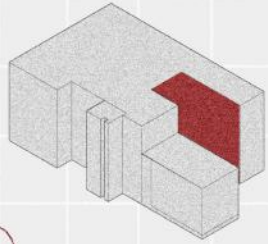

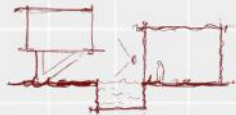

② moved backward the entrance

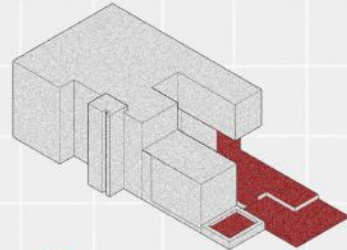

③ designed a taller volume for both:
- insist on the entrance
- to make the roof top access affordable

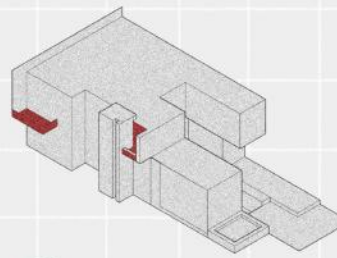

④ decreased the height of living room
to 6 meters due to the design demand

⑤ Consider a void in the middle of the building
for locating the swimming pool

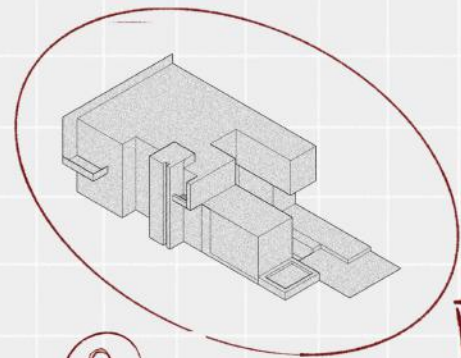

⑥ made a privacy for the outdoor activity

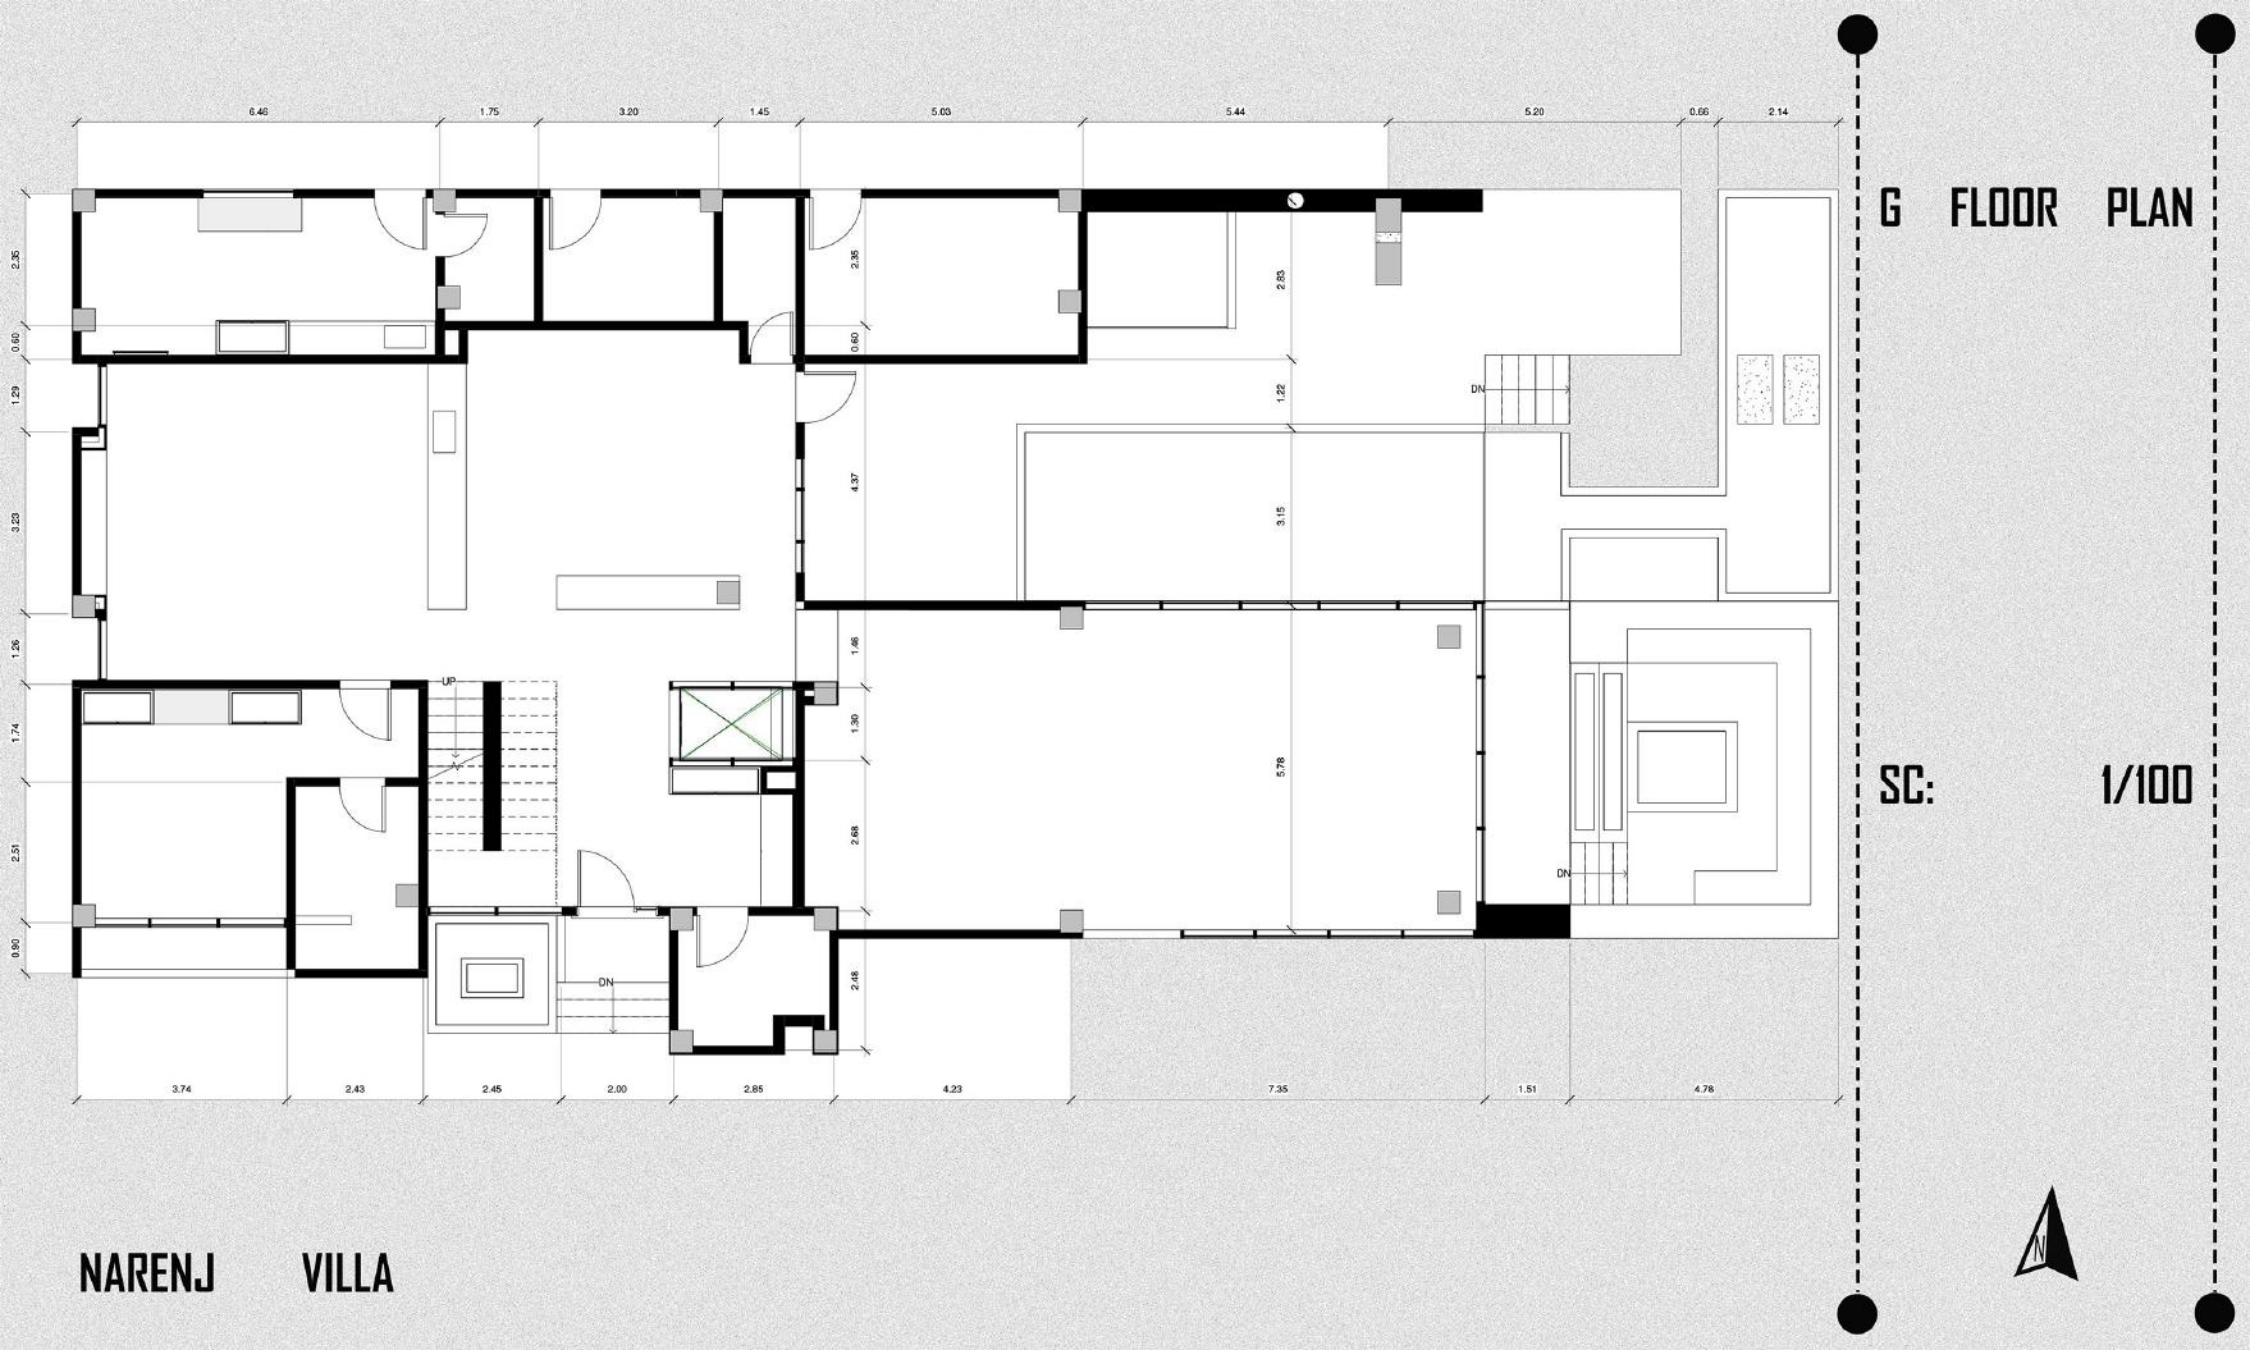

⑦

designed terraces for the upper level bedrooms

⑧
